An "internal startup" within GE that intends to "pave the way for new and exciting ways to catalyze the energy sector" by mixing alternative sources of energy, data, and "industrial Internet" solutions:

- ReduceCut down on energy costs and consumption by switching to energy-saving technology like LEDs.
- ProduceBecome more energy independent by adopting on-site generation like solar and combined heat and power.
- ShiftUse energy storage, electric vehicle charging and demand response to reduce energy costs and carbon footprints.
- OptimizeHarness data insights from the Industrial Internet to improve performance, create efficiencies and plan for the future.
